

Violence against innocent people runs counter to our work to improve human health

Oct 19, 2023

Novartis condemns all acts of terrorism and violence. Our thoughts are with all those affected by the tragic events that continue to unfold in Israel, Gaza and the West Bank. Violence against innocent people runs counter to our work to improve human health and to our fundamental belief in and respect for our common humanity.

We are monitoring the situation and remain committed to ensuring the safety and wellbeing of our associates and to providing access to medicines to patients in every country in which we operate.

We are evaluating the best way for Novartis to support the much-needed humanitarian relief efforts.
